Exposure Group No. 6

The Church Districts of Dithmarschen and Rantzau-Münsterdorf invite you to focus on how the course is set and how that reflects in justice issues

The neighbouring church districts of Rantzau-Münsterdorf and Dithmarschen extend from the outskirts of the city of Hamburg up to the North Sea. They are separated by the North Sea – Baltic Sea – Channel and connected by the motorway A23. The parishes are mainly in rural areas. Town like parishes are only a few.

The Exposure Team will focus on three main themes:

- **„Church in Town and in the Countryside“** – While meeting with parishes and attending different worship services in the districts this theme may be reflected.
- **“Old Homestead – New Homestead”** – Visiting a counselling unit of the diaconal services in Elmshorn and meeting with the parish in Barmstedt issues of flight 60 years ago and of possible support for refugees of today will be raised. Please notice that the distance between the two places will be experienced by foot walk!
- **“Old Forms of Energy Supply – New Form of Energy Supply”** – A nuclear power plant as well as a wind park are situated close to each other in the region.

The members of the Exposure Team will separate for the first night halt to be accommodated in private quarters in order to attend the Sunday Worship Service from there itself. On Sunday afternoon the whole team will move into the place “Seminarhaus Engelland” in Lüthjenweststedt. The guest house is in line with an environment friendly supply. As they are based on ecological concerns meals will be served mostly as vegetarian.

If you want to join the Exposure Team introduced to you above, please mark one of the circles according to your priority list!
